*Use Picket Component
VA_sample_baluster*

"Use Picket Component" example

1. For this example I created a picket component.

2. I made a balcony outline and enclosed it in a group.

3. I set the following parameters

MISC PARAMETERS

Slope Step

Drop to Terrain? Yes No End Pts

Extend Bottom? Yes No

Shorten Segments? Yes No

Max Length:

Pilaster Rotation:

Datum for Infill: Pilaster Wall Grade

WALL

PILASTERS
