

Instant Road

Parameters Road from Face(s)

In each of the examples, a different setting or group of settings is chosen. The corresponding result is shown on the right.

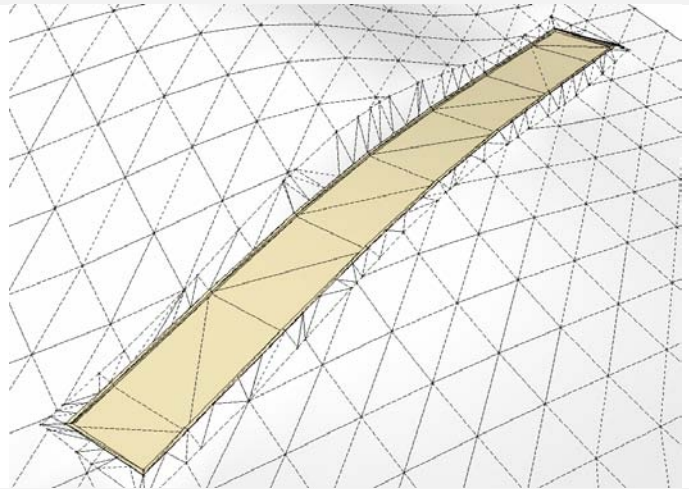

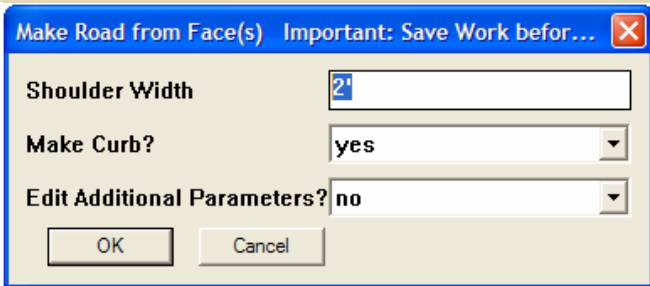

(If you're not using the Pro version, the maximum shoulder width is 3' and curb width is 6")

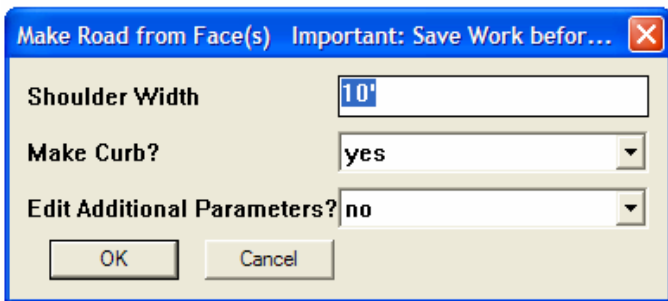

To try out these parameter settings, make a terrain plus a horizontal face in the shape road. Draw a line across the road at each end to force the ends to be level. The road surface must be active and the faces must be in a group.

Select the group plus the road surface and choose **Plugins/ Instant Road / Road from Face(s)**.

Shoulder Width: 2'

Shoulder Width: 10'

Adjust Road Subgrade Height: 5'

Additional Parameters [X]

Adjust Road Subgrade Height: +/-

Max Road Segment Length

Flatten Vertical Curves and Bumps?

Flatten Vertical Curves Smaller Than:

Curb Height (above Road)

Curb or Sidewalk Width

Top of Curb above or below grade +/-

Adjust Road Subgrade Height: -5'

Additional Parameters [X]

Adjust Road Subgrade Height: +/-

Max Road Segment Length

Flatten Vertical Curves and Bumps?

Flatten Vertical Curves Smaller Than:

Curb Height (above Road)

Curb or Sidewalk Width

Top of Curb above or below grade +/-

Max Road Segment Length: 200'

Additional Parameters [X]

Adjust Road Subgrade Height: +/-

Max Road Segment Length

Flatten Vertical Curves and Bumps?

Flatten Vertical Curves Smaller Than:

Curb Height (above Road)

Curb or Sidewalk Width

Top of Curb above or below grade +/-

Max Road Segment Length: 5'

Additional Parameters [X]

Adjust Road Subgrade Height: +/-

Max Road Segment Length

Flatten Vertical Curves and Bumps?

Flatten Vertical Curves Smaller Than:

Curb Height (above Road)

Curb or Sidewalk Width

Top of Curb above or below grade +/-

Top of Curb above or below grade +/-: 6"

Additional Parameters ✕

Adjust Road Subgrade Height: +/-	0"
Max Road Segment Length	20'
Flatten Vertical Curves and Bumps?	yes
Flatten Vertical Curves Smaller Than:	10'
Curb Height (above Road)	6"
Curb or Sidewalk Width	6"
Top of Curb above or below grade +/-	6

Top of Curb above or below grade +/-: -1'

Additional Parameters ✕

Adjust Road Subgrade Height: +/-	0"
Max Road Segment Length	20'
Flatten Vertical Curves and Bumps?	yes
Flatten Vertical Curves Smaller Than:	10'
Curb Height (above Road)	6"
Curb or Sidewalk Width	6"
Top of Curb above or below grade +/-	1

Curb Height (above Road): 4'

Additional Parameters ✕

Adjust Road Subgrade Height: +/-	0"
Max Road Segment Length	20'
Flatten Vertical Curves and Bumps?	yes
Flatten Vertical Curves Smaller Than:	10'
Curb Height (above Road)	4'
Curb or Sidewalk Width	6"
Top of Curb above or below grade +/-	1"

Curb or Sidewalk Width: 3'

Additional Parameters ✕

Adjust Road Subgrade Height: +/-	0"
Max Road Segment Length	20'
Flatten Vertical Curves and Bumps?	no
Flatten Vertical Curves Smaller Than:	10'
Curb Height (above Road)	6"
Curb or Sidewalk Width	3'
Top of Curb above or below grade +/-	1"

To try out these parameter settings, make a coarse, low polygon terrain plus a horizontal face in the shape road. Draw a line across the road at each end to force the ends to be level. The road surface must be active and the faces must be in a group.

Select the group plus the road surface and choose **Plugins/ Instant Road / Road from Face(s)**. In the next menu choose **Edit Additional Parameters?** : **yes**

Max Road Segment Length: 5'
Flatten Vertical Curves and Bumps? no

Additional Parameters	
Adjust Road Subgrade Height: +/-	0"
Max Road Segment Length	5'
Flatten Vertical Curves and Bumps?	no
Flatten Vertical Curves Smaller Than:	10'
Curb Height (above Road)	6"
Curb or Sidewalk Width	6
Top of Curb above or below grade +/-	1"
<input type="button" value="OK"/> <input type="button" value="Cancel"/>	

Flatten Vertical Curves and Bumps? yes
Flatten Vertical Curves Smaller Than: 30'

Additional Parameters	
Adjust Road Subgrade Height: +/-	0"
Max Road Segment Length	5'
Flatten Vertical Curves and Bumps?	yes
Flatten Vertical Curves Smaller Than:	30'
Curb Height (above Road)	6"
Curb or Sidewalk Width	6"
Top of Curb above or below grade +/-	1"
<input type="button" value="OK"/> <input type="button" value="Cancel"/>	

Why not always flatten vertical curves? Because a cross slope can occur when the road is curved - especially if the "...Curves Smaller Than" value is greater than the width of the road.
