Vali Architects Extension Installation

Windows installation is shown here, however it is identical for Macintosh.

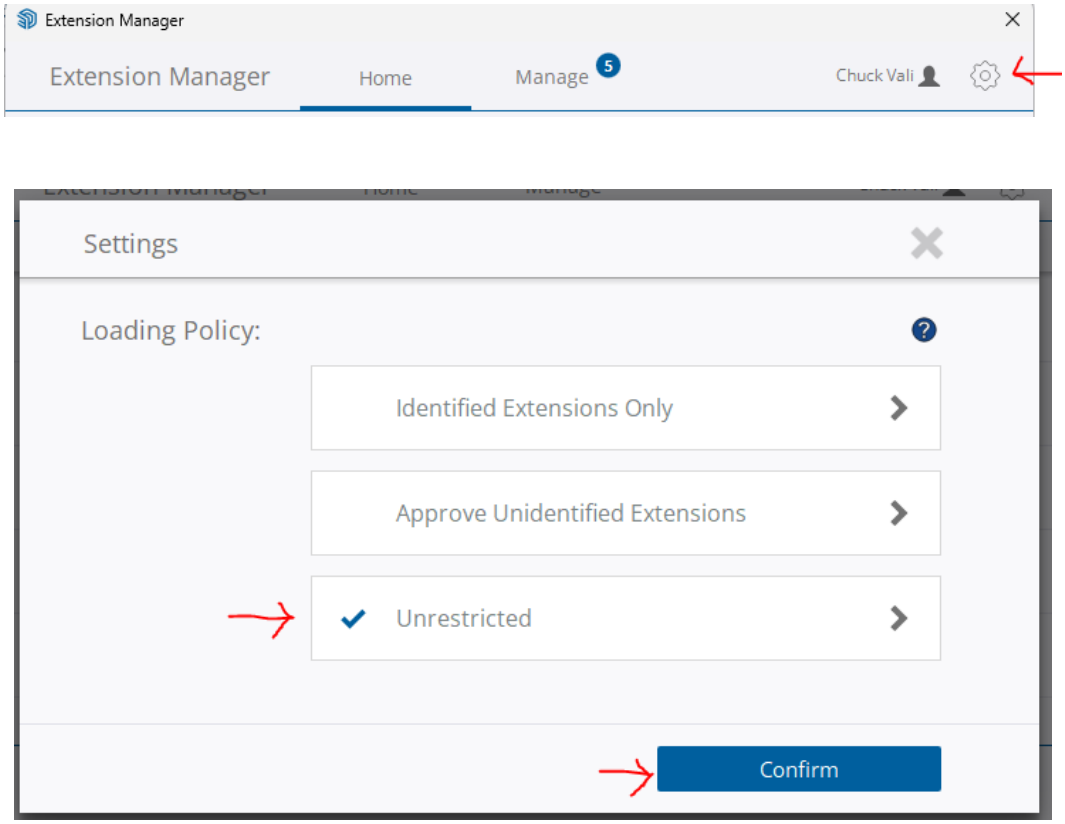

1. Download InstantSiteGraderNuiInstall.rbz from your account on valiarchitects.com
2. Start Sketchup. Click From the 'Extensions" , "Install Extension".

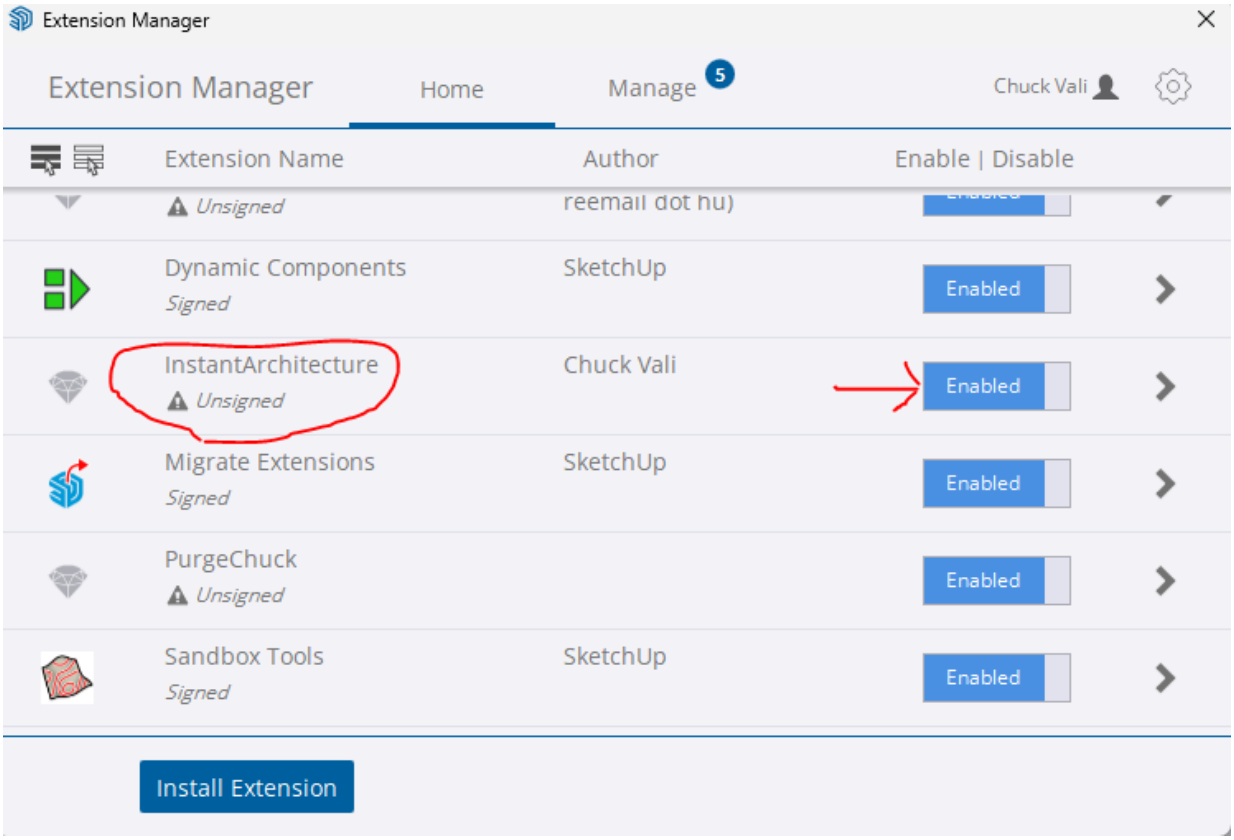

3. Navigate to the downloaded .rbz file and select it. Click "Open".

4. Wait until it finishes the install. Click the Settings gear icon. Confirm that Loading Policy is set to Unrestricted.

5. Set Enabled by the extension name.

6. Close Extension Manager.

7. Shut down Sketchup. (This is important. Sketchup may show a message that the extension is ready to use but you must shut it down for my extensions)

8. Restart Sketchup.

9. If you don't see a toolbar, click View, Toolbars, and check the box next to the toolbar.
