Vali Architects Extensions *Multiple Computers*

A single license may be used on any number of computers, but only one at a time. To switch between computers, log on to your account at valiarchitects.com, click “My Account” check the box next to the extension, and click “Reactivate”. The license becomes free and unassociated with any particular computer. The next time that extension is run the computer that runs it will be associated with the license.

Multiple licenses are similar to a roving license. All licenses for each plugin are included in a single download file that gets installed on all computers. Computers are associated with licenses on a first come first serve basis. Once all licenses are associated, if a different computer attempts to use the plugin, a message will pop up telling you to log on to your account and click 'Reactivate'. This frees up all the licenses which are again associated with machines on a first come first served basis. Should you add licenses at a later date, it is necessary to download and install again on all your computers.
