Use Component

("VA_Sample_Post_Guardrail" is shown here, but any component in the model can be used)

Post Parameters

Width: 3 1/2"
Depth: 2"
Reduce Spacing: Yes / No
Post Rotation: Align with Fence

Depth: 2"
Reduce Spacing: Yes / No
Max Spacing: 6'
Post Rotation: Align with Fence

Reduce Spacing: Yes / No
Max Spacing: 6'
Post Rotation: Align with Fence
Extend Post Bottom?
Include Curves?
Align with Fence
Align with Miters
with Miters except 90 Deg
Random Rotation

Reduce Spacing: Yes / No
Max Spacing: 6'
Post Rotation: Align with Miters
Extend Post Bottom?
Include Curves?
Align with Fence
Align with Miters
with Miters except 90 Deg
Random Rotation

Reduce Spacing: Yes / No
Max Spacing: 6'
Post Rotation: with Miters except 90 Deg
Extend Post Bottom?
Include Curves?
Align with Fence
Align with Miters
with Miters except 90 Deg
Random Rotation
PAIRED

Reduce Spacing: Yes / No
Max Spacing: 6'
Post Rotation: Random Rotation
Extend Post Bottom?
Include Curves?
Align with Fence
Align with Miters
with Miters except 90 Deg
Random Rotation
PAIRED

Max Spacing: 6'
Post Rotation: Random Rotation
Extend Post Bottom?: Yes / No
Additional Depth: 6"

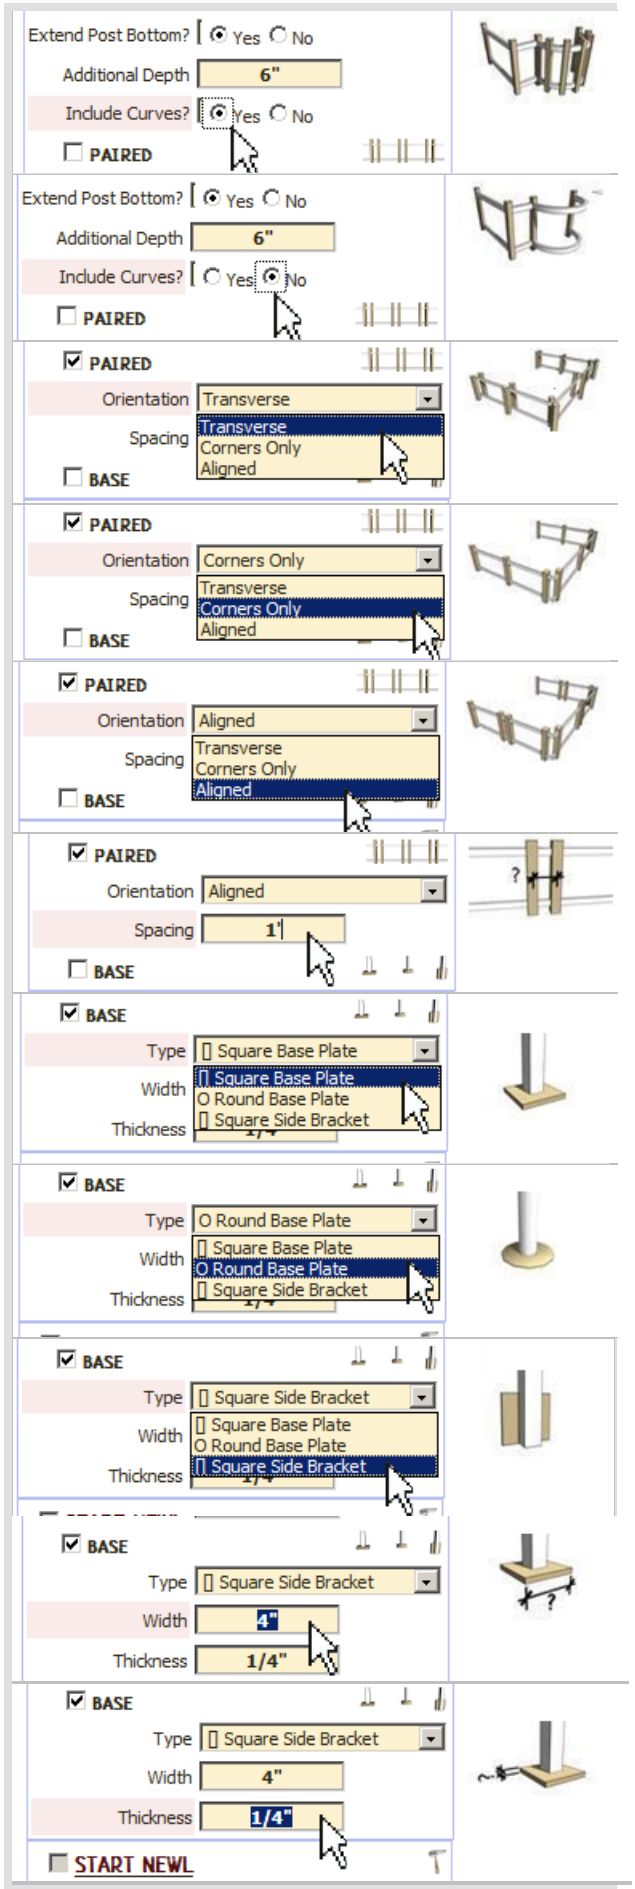

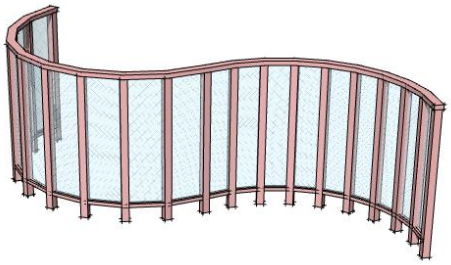

Max Spacing: 6'
Post Rotation: Random Rotation
Extend Post Bottom?: Yes / No
Include Curves?: Yes / No

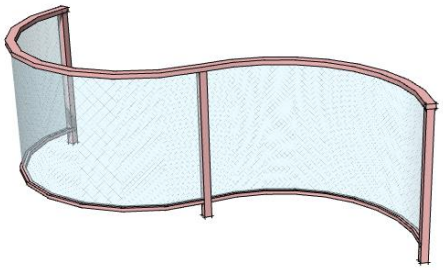

Max Spacing: 6'
Post Rotation: Random Rotation
Extend Post Bottom?: Yes / No
Additional Depth: 6"
Include Curves?: Yes / No

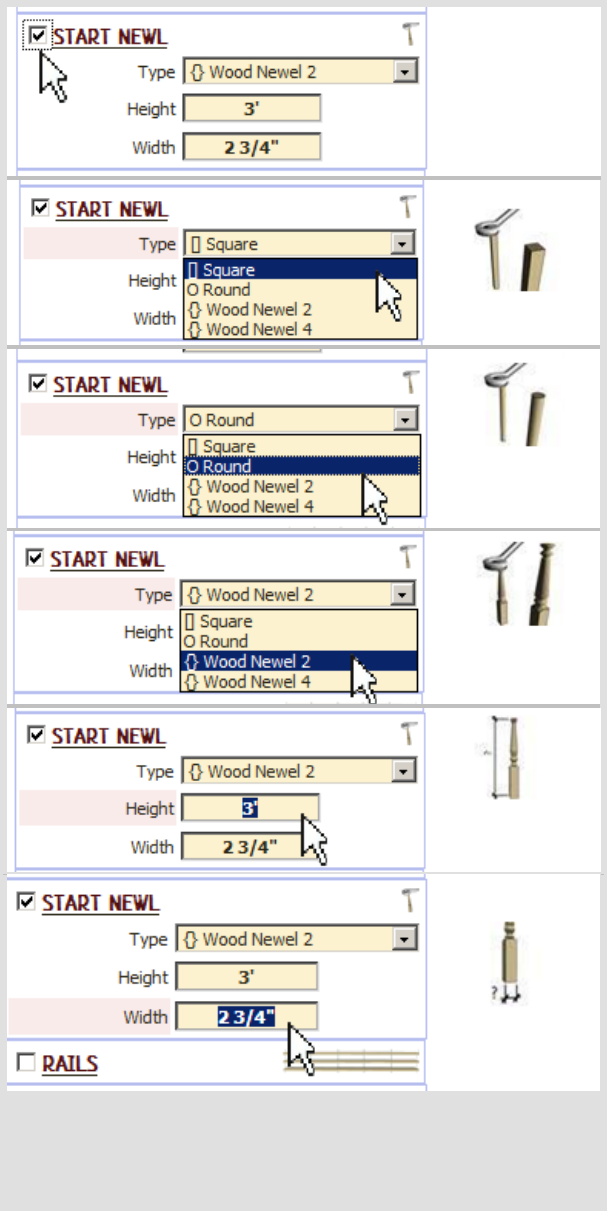

*Include Curve:"**Yes**" = Place post at every break in curve.*

*Include Curve:"**No**"= Place posts and curve endpoints only.*

“Start Newel *Starting Newels are only available when a handrail is being made and a volute has been selected for the handrail end. The newel will be located in the center of the volute. See tutorial on handrails for additional information.*
