Instant Road — THE Plugin for creating roads and paths in SketchUp

Overview

Features

- Automates creation of roads, pathways, and waterways on a terrain using either an outline or a centerline for input.
- Creates center medians and islands.
- Creates curbs, sidewalks, depressed road surfaces, or raised road surfaces.
- Intersections are allowed, but not closed loops

Create Road from CenterLine

Selection:	Output:	Groups added to model:

Road Surface

Curb or sidewalk
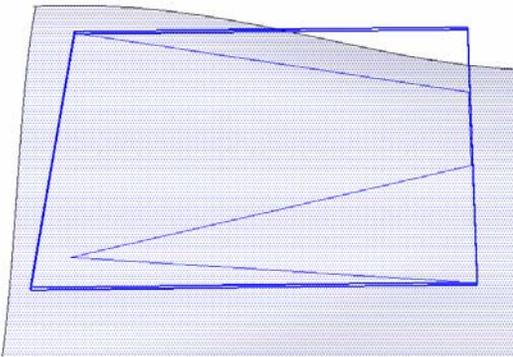

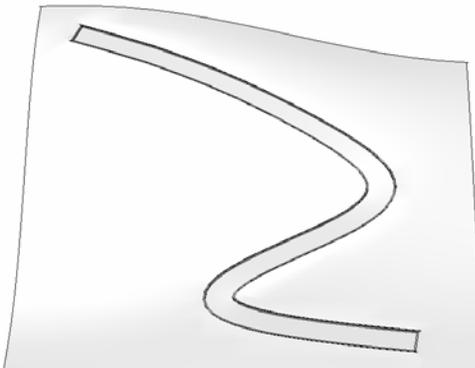

Create Road from Faces

Selection:	Output:	Groups added to model:

Road Surface

Curb or sidewalk
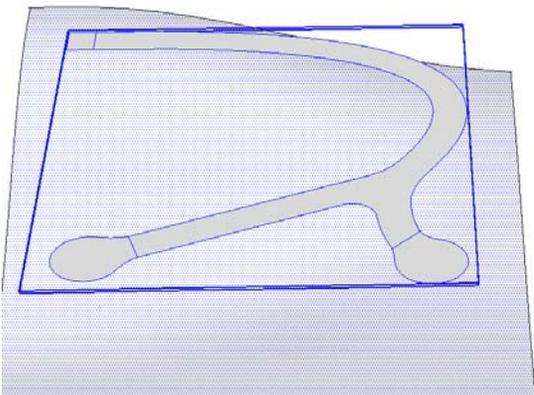

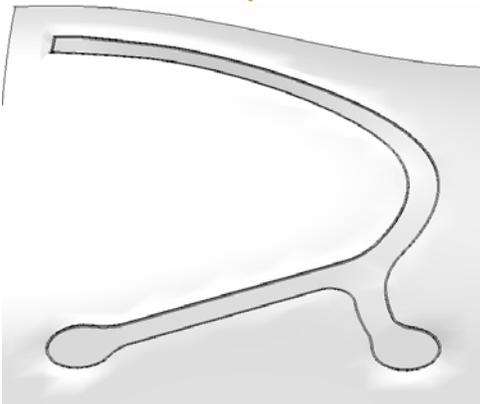

Make Island or Median

Selection:	Output:	Groups added to model:

Median Surface

Curb or sidewalk
